This current varying in parallel circuits brought about Kirchoff's next big law in basic electrical engineering, Kirchoff's Current Law (KCL). This law basically states that current into a node will equal the current out of the node. In other words, the net current in a node is zero or  $0 = I(\text{in}) - I(\text{out})$ .

your own. These are the two sites which will enable you to learn, practically the entire syllabus of Electrical Engineering all by your self.

## **Is it possible to self-study electrical engineering? - Quora**

**FUNDAMENTALS OF ELECTRICITY** The technical term electricity is the property of certain particles to possess a force field which is neither gravitational nor nuclear. To understand what this means, we need to start simply. Everything, from water and air to rocks, plants and animals, is made up of minute particles called atoms.
